

Community AAI as a Service (CAAaaS) 1/2

Solutions covered by IAM4NFDI for the operation of individual Community AAI

- AcademicID, didmos, RegApp, Unity
- All four solutions are already in productive use in one or more NFDI community.

Goals in IAM4NFDI

- Initialization phase: provision of demo installations/tenants for the four CAAI solutions
- Integration phase: development of an operating model to enable professional services for the operation of the CAAI solutions “as a Service” for NFDI communities

Community AAI as a Service (CAAIaaS) 2/2

Coverage of CAAIaaS in IAM4NFDI:

- Single-instance or tenant-style CAAI demo operation, depending on the CAAI solution.
- Enable professional services for
 - CAAI customization to meet the specific needs of the NFDI communities,
 - operation of CAAI solutions for NFDI communities and
 - 2nd/3rd level support for authentication/authorization requests from community members.

Not part of IAM4NFDI

- Professional services funding (financial/staff), NFDI communities will need to provide resources for the professional services.
